FRIDAY, June 8-P. M.

There was no feature of special interest in the Stock market, but a general sluggishness, difficult of explanation. The usual Summer apathy appears to have set in earlier than usual, although the elements of the market would have indicated the reverse result. There is no pressure of stock upon the market, although there was to-day rather more disposition shown on the part of the bear jobbers to extend their short lines. The foreign news had no perceptible effect upon prices. At the close of Morning Board, there was some appear-ance of firmness, but this was all lost subsequently, and at the Second Board the market was | a | + cent lower for nearly the whole list. The most important decline of the day has been in Pacific Mail, which opened at 93), and under moderate sales fell off to 91) after the Second Board. We hear of no special reason for this decline, excepting the realizing sales of parties who bought at lower prices. The Company have paid today dividends upon 60 shares, making an aggregate of 915 shares beyond the legal capital. We are informed that nothing newhas turned up in regard to the affairs of the Company. There are no registered sales of Panama excepting five shares, but the market closed at 134 bid. The sales of Hudson River are also very small, in consequence of the small amount of stock offering. The price is well supported. Harlem is comparatively firm, and in good demand. The market for Western shares was without marked change. The tendency was downward until the close, when there was a favorable but unimportant reaction. Central closed at 81; bid, against 82; yesterday. In the Bond market there is more firmness than in shares, but the transactions are limited. Government 5s, 1855, sold at 1024, which is again better; the registered of 1874 are held at 1041; Missouri 6 are also better, selling at 841. The business in Railway bonds was moderate, at full prices. La Crosse, however, fell off to 18. The stock of this Company sold to-day at 1 \$\psi\$ cent, although the time for redemption under the fore-closure sale expired last month. The general market was stronger in the street after the Second Board, but still very inactive. The closing prices were: Virginia 6s. 931 @ 931; Missouri 6s. 841 @ 841; Canton Company, 201 #21; Cumberland Coal, 13} #14 Pacific Mail, 911 2911: New-York Central Railroad, 81 282; Erie, 191 @ 192; Hudson River Railroad, 481 @ 49; Harlem Railroad, 12; # 12i; Hariem Preferred, 39; # 239; Reading Railroad, 41; # 411; Michigan Central Railroad, 52; # 52; Michigan Southern and Northern Indiana Railroad, 12; # 12i; do. The business in foreign bills for the steamer to morrow has been light, and rates were scarcely main-Sterling at the close, but the best bills could be had at 109}. France were 5,15 a 5,13}.

Freights: to Liverpool, 900 bbls. Flour on private terms; 1,300 bush, Corn at 7d., ship's bags; 100 tuns Oil Cake on private terms, and 5 tuns Oil at 24s. Some further shipments were made in grain, but the particulars are withheld. To London, 2,000 bbls, Flour at 2s. 3d. To Clasgow, 2,000 bush. Peas, in bulk, at 711. shipper's bags. To Bremen, 500 bbls. Rosin at 1s. 9d. A bark of 277 tuns, home from South Side of Cuba at 38c. for Sugar, and \$3 for Molasses on deck.

The business of the Sub-Treasury was: Receipts, \$86,829 01-Customs, \$81.000; Payments, \$141,

950 59; Balance, \$6,533,799 30. The receipts of the Harlem Road for the month of

May are as follows : 1860

This apparent decrease results from the charges for two months of connecting roads being deducted at this time instead of one. The business of the month itself shows a gain over last year of \$827 69. The receipts and expenses for the first eight months of the fiscal year (October to June), stand as follows :

8 mos. cuding May 21, 1866. \$789,517,44 461,783,18

Net profit............ #218,549 95 Showing an increase in receipts of \$40,960 78, and a decrease of expenses of \$18,223 53, making a net improvement in eight months of \$59,184 41. Extensive repairs have at the same time been made in the track and rolling stock, both of which are now in good order. Every train upon the road is now run with coalburning engines. The saving in fuel in consequence of the reduction of the mileage and the use of coal has been very great. In 1854-5, the item of coal amounted to \$129,349; in 1855-6, to \$130,961; in 1859, to \$61,155, and for the present year it will not exceed \$55,900showing a saving in this item alone of \$75,000 over previous years.

The May receipts of the Norwich and Worcester Road are not yet made up, but look like \$2,500 increase over May last year. We understand an arrangement was concluded yesterday by which the boat line will consist for the current year of the Vanderbilt and Connecticut, both good boats, and that the Railroad Company have the right to purchase the boats at a named price at any time within four months. The Railroad Company, under the arrangement, have fifty five P cent of the receipts, and the boat Company for ty-five P cent, with an additional allowance of \$1,000

The May traffic on the Southern Michigan Road we understand to be, in round numbers, \$189,000, against \$137,000 same month last season-an increase

The current business of the Erie Road is very favorable, May, when settled up promising to shew about \$100,000 net increase over the same month of 1859. Its condition in other respects is, however, less satisfac-tory, and the plan of reorganization meets with a se-ticus embarrassment in the unfortunate maturity of the second mortgage bonds. We stated some time since

that the parties who declined to accept the terms of ex. ension had commenced a suit of foreclosure. This suit being pressed with energy, and Mr. Cambreling has b. en appointed by the Court a referee to deling has be a appointed by the Court a referee to decide what property is covered by the mortgage. When this point is set, led, the bendholders will press for a decree of sale, which there is no doubt they will obtain. In this case, the rotal will be sold, subject to the first mortgage of three millions, and the purchasers will be obliged to furnish four millions is cash to pay off the second mortgage and as much more to make up the purchase-money as could not be otherwise arranged with the third and fourth and fifth mortgagees. The entire mortgage debt is about \$18,000,000, and in case of sale under the 2d mortgage, it would become necessary for the holders of the junior and unscenred bonds to combine for the protection of their interests, and these parties must be ready to contribute in cash the four millions for the reimbursement of the second mortgage holders. It is full time that the parties in interest should be moving in this matter, for unless such a combination is organized and prepared to bid, the property may be sold away from them, and will not probably bring a sum sufficient to cover the fifth mortgage, to say nothing of the unsecured bonds and stock. It is very evident that if the road should go to sale without a proper organization to protect the interests of all, the property will be slaughtered, and the stock, and a portion if not all the unsecured debt will be wiped out. This state of things is no doubt the cause of the recent decline in the stock and unsecured bonds. Meanwhile it is the paramount duty of the Directors of the Company to endeavor at once to obviate the necessity of a sale by making some arrangement for extending, if possible, the Second Mortgage bonds, by offering a fair bonus to the holders. Such a course as this would be much more to the advantage of the minor securities than to allow the read to go to sale. The necessity for some action is the more imperative, as the counsel of the Company has stated that no logal title to the road can be given under the plan of reor-ganization until this Second Mortgage is arranged.

A meeting was held this afternoon, at the office of Messrs. Foster & Thompson, of a portion of the holders of the lew numbers of La Crosse and Milwaukee Railroad Company Land-Grant Bonds (the first \$2,500,000), of which Mr. Galpin was chairman. A resolution was offered, to the effect that a discrimination between the different numbers be recognized. This was opposed by apparently a large majority of those present, and, as a substitute, a resolution was passed that the Chairman appoint a Committee of seven to consult with the Committee of General Bondholders, of which Mr. Jackson was chairman, to devise such course of action as shall be for the benefit of all the bendbelders. The meeting failed to indicate that the division of interests was either desirable or just.

The following constitute the Committee: Horney Galpin, Orville Oddie, John Nicholson, Wm. Gould, Francis Randall, Francis Vose, and Wm. A. Kobbe. We annex a comparative statement of the imports of foreign Dry Goods at New-York, for the week, and

The annual election of the Burlington and Quincy Road takes place on the 22d. This Company has earned a dividend, but it is not known what action the new Board will take in the matter. The Company suspended dividends in consequence, partly, of the large floating debt, incurred in making advances to the Peeria and Oquawka Company. This debt is now reduced to about \$60,000, against which the Company nained at the close. Leading drawers asked 102 for has bille receivable to the amount of \$50,000, and will be paid off by the 1st of August, in addition to providing for the July coupens. Some of the Directors have heretofore opposed the declaration of a dividend, in consequence of this floating debt, but this obstacle will soon be removed. The fiscal year ended on the 30th April, when there must have been about \$750,000 to the credit of the income account, equal to over 16 ? on the capital stock of \$1,631,000. Since the fiscal year ended the receipts have shown about 75 4 cent increase over the same period of last year.

The Mississippi and Missouri Railroad Company held its annual meeting in Davenport on the 5th inst. The officers elected were: President, the Hon. John A. Dix of New-York; Transurer, F. H. Tows of New-York; Secretary, Hiram Price of Davenport. The old Board of Directors was elected, and the Hon. J. B. Grinnell of Grinnell, Iowa, was added to the Board, which embraces the Hon. N. B. Judd and W. B. Ogden of Chicago. The road is now progressing westward through the energy of Mr. T. C. Durant of New-York, the contractor, who will soon have 30 miles of

track laid west of Iowa City.

The election of officers for the Ohio and Mississippi Railroad, Eastern Division, resulted as follows: President, John W. Alsop: Vice-President, E. Flint; Treasurer, Chas. S. Cone; Secretary, Samuel Trevor.

The Cincinnati Gazetle of the 6th says:

"In the Money market there is no excess in the supply of capital, full employment being found for the means at the disposal of the discount houses at 10 mil 10 cc. Neither is there any excess in the offering of good paper, and acceptable mans are taken freely at the rates. No. 1 signatures going at 10 P cent, and in some cases at a shade loss. Stringent features were observable to some extent on Saunday and Monday, but these resulted from the name heavy payments of the 4th, and have since disppeared. The market is now comfortable, with a tendency, as may be inferred from the foregoing remarks, to a very easy condition. Eastern Exchange is steady, with a supply and demand about equal. Bankers hay New York at 37 2 4s, the inside the prevaling figure, and Baltimore and Boston at 37. The selling rate is 4 premium."

The Africa bripps London dates to the 26th ult.

The Africa brings London dates to the 25th ult. Money continued easy at 31 P cent since the reduction by the bank. The demand was not active. The reduction of the rate of interest produced no marked effect. Consols had been buoyant, but at the close were lower, being quoted at 95 w951. The bullion in the bank had largely increased. The Breadstuff markets were steady, as also were the better grades of Cotton. In regard to American securities Messrs, D. Bell, Son & Co. report as follows:

"The market for American securities continues inactive, while it is much easier to find purchasers than sellers of the various State Stocks. In Railroad Bonds, during the last week, the demand has been chiefly for the Panama 7 P cents of 1835."

According to the appearance of the foreign exchanges, there is little prospect that it will be followed by any speedy reaction. Indeed, the prohabilities he rather in the direction of increased-case, the political uncertainties of the continent tending not only to prevent expital from being widely diffused in trading operations, but also to render it difficult for Russian, Austrian, or other foreign loans to be contracted in the London market. Of the Grain trade, The Liverpool Times of May

Of the Grain trace, I he trace, I have been all to produce its usual depressing effect on the Grain trade, so far at least as regards wheat, in which a good business has been done at the provincial markets during the week, and supplies in most cases fulling short of the demand, the value has pretty generally been enhanced 1/27, 27 quarter, as compared with the quotations of last week. The trade here has tuled firm for wheat and flour, and a fair amount of transactions has taken place in the former at prices the turn dester, chiefly for consumption; while in other articles but loses has been quite restricted. The Grazette returns of wheat for the week ended 18th lost, are 59,230 quarters, being 10,111 quarters less than that of the preceding week."
